Empathy Map

Wandr AI – AI Travel Itinerary Planner

User Persona: Priya, 27, Software Engineer, Bengaluru

Name	Priya Sharma
Age	27
Occupation	Software Engineer
Travel Type	Solo & group trips 2-3 times/year
Tech Comfort	High — uses apps daily
Travel Budget	Mid-range (■50,000–■1,50,000 per trip)

Empathy Map Quadrants

Quadrant	What Priya Says / Does / Thinks / Feels
SAYS	"I spend entire weekends just researching what to do on a 5-day trip." "I always go over budget because I didn't account for everything."
THINKS	"There must be a smarter way to plan." "What if the AI gives me generic suggestions that don't match my taste?"
DOES	Opens 10+ browser tabs. Copies itinerary fragments into a Google Doc. Shares the doc with travel companions and edits it 5+ times.
FEELS	Overwhelmed by the volume of information. Excited once a plan comes together. Anxious about missing something important (transport, opening hours).
PAINS	Time lost researching. Budget surprises. No single source of truth. Generic recommendations that don't fit her travel style.
GAINS	A complete, personalised itinerary in seconds. Editable by day. Budget tracked upfront. Ability to regenerate any single day she dislikes.

Key Insight

Priya values **speed, personalisation, and flexibility**. She is willing to trust AI-generated content if she retains the ability to modify individual days and if budget implications are transparent from the start. Wandr AI's day-regeneration feature and Recharts budget visualisation directly address these needs.
