Customer Journey Map

Wandr AI – AI Travel Itinerary Planner

Journey: From Landing Page to First Generated Itinerary

Stage	User Action	Touchpoint	Emotion	Pain / Opportunity
Awareness	Finds Wandr AI via search or referral	Landing page	Curious	Must communicate value in 5 seconds
Sign Up	Clicks 'Get Started Free', enters email/pw	Signup form + Supabase	Hopeful	Email confirmation friction (Supabase rate limit)
Onboarding	Lands on Dashboard, sees empty state	Dashboard / New Trip CTA	Uncertain	Clear CTA needed to guide first trip
Trip Creation	Fills trip form: destination, dates, budget	Create Trip page	Engaged	Too many fields? Help text reduces cognitive load
AI Generation	Clicks Generate Itinerary, waits 10-30 s	Backend + Groq API	Anticipating	Loading state must reassure user AI is working
Review Plan	Browses day-by-day itinerary	Trip Detail page	Excited	Information density must not overwhelm
Customise	Regenerates Day 3, edits Day 1 title	Edit / Regenerate actions	Empowered	Opportunity to increase session depth
Budget Check	Opens Budget tab, sees cost breakdown	Recharts budget panel	Satisfied	Visual budget vs. estimate builds trust
Return Visit	Logs in again, views saved trips list	Trips list / Dashboard	Loyal	Encourage sharing or creating more trips

Moments of Truth

- **First AI generation:** The quality and speed of the first itinerary sets the entire product impression.
- **Day regeneration:** Users who regenerate at least one day are significantly more likely to return (hypothesis).
- **Budget tab view:** Seeing a transparent cost breakdown builds confidence in planning accuracy.
