No. of Functional Features Included in the Solution

Wandr AI – AI Travel Itinerary Planner

Functional Feature Inventory

#	Feature	Route / Component	Status
1	Email/password signup	POST Supabase Auth / SignupPage.tsx	Implemented
2	Email/password login	POST Supabase Auth / LoginPage.tsx	Implemented
3	Protected route guard	ProtectedRoute.tsx + AuthContext	Implemented
4	Trip creation form with validation	POST /api/trips/generate / CreateTripPage.tsx	Implemented
5	AI itinerary generation (Groq)	ai_service.py → generate_itinerary()	Implemented
6	Full itinerary display (day cards + activities)	GET /api/trips/{id} / TripDetailPage.tsx	Implemented
7	Paginated trips list	GET /api/trips?page=1 &page;_size=20	Implemented
8	Trip metadata editing	PATCH /api/trips/{id} / EditTripPage.tsx	Implemented
9	Trip deletion	DELETE /api/trips/{id}	Implemented
10	Single day regeneration (AI)	POST /api/trips/{id}/days/{day_id}/regenerate	Implemented
11	Budget breakdown view	GET /api/trips/{id}/budget / BudgetPanel.tsx	Implemented
12	Recharts budget visualisation	BudgetPanel.tsx	Implemented
13	Single day metadata editing	PATCH /api/trips/{id}/days/{day_id}	Implemented
14	Profile page	/profile / ProfilePage.tsx	Implemented
15	Dashboard with overview	/dashboard / DashboardPage.tsx	Implemented
16	Health check endpoint	GET /api/health	Implemented

17	CORS protection (regex allowlist)	CORSMiddleware in main.py	Implemented
18	JWT authentication middleware	security.py / get_current_user	Implemented
19	Row Level Security (RLS)	Supabase SQL migration 001	Implemented
20	Groq API retry with exponential backoff	ai_service.py / tenacity @retry	Implemented

Feature Count Summary

Total features implemented	20
Must-have features	13 of 13 (100%)
Should-have features	5 of 5 (100%)
Could-have features	2 of 2 (100%)
Won't-have features (v1)	0 – deferred by design
Backend API endpoints	8
Frontend pages	10
Automated tests	34 (pytest)
