Communication

Wandr AI – AI Travel Itinerary Planner

1. Project Communication Summary

This document outlines the communication structure, stakeholder update cadence, and key messages delivered throughout the Wandr AI project lifecycle.

2. Key Stakeholder Messages

Stakeholder	Key Message	Channel	Frequency
Project team	Sprint goals, blockers, decisions	Stand-up + task board	Daily
Instructor	Progress against milestones, demo readiness	Progress report + demo	Weekly
End users	Product value: saves hours of planning	Landing page, demo video	At launch
Evaluators	Technical quality, security, scalability	Documentation + demo	At submission

3. Communication Artifacts Produced

Artifact	Purpose	Audience
README.md (25 KB)	Comprehensive setup and deployment guide	Developers / Evaluators
SETUP.md	Quick-start guide for local setup	Developers
API Swagger Docs (/docs)	Interactive API reference	Developers / Evaluators
Health check endpoint (/api/health)	Real-time configuration status	Ops / Evaluators
This documentation folder structure	Complete project documentation	Evaluators

4. Technical Communication Highlights

- All backend environment variables are documented with exact names, sources, and whether each is a secret.
- Deployment guide clearly separates Vercel dashboard configuration from Render dashboard configuration.
- Troubleshooting section covers 9 specific scenarios with root cause and fix.

• The health endpoint communicates service status in machine-readable JSON for automated monitoring.
